<sup>1</sup> Federal Medical Assistance Percentage (FMAP) is the share of the cost of Medicaid that the federal government bears. That share varies by state depending on a state's per capita income. The average state FMAP is 60%, but ranges from 50% in wealthier states up to 74% in states with lower per capita incomes (the maximum FMAP is 83%). FMAPs are adjusted for each state on a three year cycle to account for fluctuations in the economy.

Federal match rates in FY 09, FY 10 and the first quarter of FY 11 were enhanced due to federal stimulus provisions of the American Reinvestment and Recovery Act of 2009 (ARRA). This enhanced match rate resulted in the state receiving additional federal funds during this period.
