Overall Federal Funding Percentage	67.6%	67.6%	67.6%
Overall State Funding Percentage	32.4%	32.4%	32.4%
State General Fund Percentage	10.2%	11.0%	10.7%

¹. Population figures are based on U.S. Census data from the Center for Business and Economic Research, University of Alabama. The population counts are extrapolated from 2010 Census data. The child population figure is apportioned from the same data, calculating the 20-24 age group to reflect that Medicaid stops for children at age 21.

². An unduplicated count of individuals who qualified for full or partial Medicaid coverage and were enrolled in Medicaid for at least one month of the fiscal year.

³. Child/Children defined as those under age 21.

⁴. Total Medicaid medical services expenditures exclude Agency administrative costs, administrative costs of the school-based services program, payments to hospitals under the Disproportionate Share Hospital program, and expenses of the Health Information Exchange.

⁵. Total Medicaid medical services expenditures divided by the monthly average of eligible members.
