[Chronic stable coronary artery disease \(CAD\) Measurement Set](#)(summary document, including the evidence base for the measures) (PDF, 423KB, requires [Adobe® Reader](#)).

Measure specifications

The Physician Consortium for Performance Improvement (Consortium) provides specifications for obtaining the required data elements for its clinical performance measures based on the selected data source. [More detailed specification information](#) (PDF, 14KB) for electronic medical records, paper medical records, and use of administrative data is available.

Specifications for electronic medical records

- [Algorithm for measures calculation](#) (PDF, 200KB) [Version 3.0; 07/07 - Posted 6/12/07]
- [Release notes](#) (PDF, 41KB) [Version 3.0; 07/07 - Posted 6/12/07]
- [Coding specifications \(CPT® Category I, CPT® Category II, ICD-9, SNOMED CT®, LOINC®, NDC\)](#) (Excel, 2.9MB) [Version 3.0; 07/07 - Posted 6/12/07]

Specifications for paper medical records

- [Prospective data abstraction tool](#) (PDF, 31KB)
- [Retrospective data abstraction tool](#) (PDF, 20KB)
- [Data abstraction definitions \(including synonyms\)](#) (PDF, 59KB)
- [Medication table](#) (Excel, 69KB)

Specifications for administrative data (paper or electronic)

- [CPT® Category II Codes](#)(PDF, 121KB) [Version 2.0; 07/06 - Posted 6/9/06]
- CPT® Category I Codes and ICD-9 Codes to be provided at a later date.
