Provider Electronic Solutions Software

Instructions for HP Provider Electronic Solutions 3.02 Full Install

1. Review the information on the page. Use the scroll bar to move down the page, until you see the latest Provider Electronic Solutions Full Install. Click on the "ZIP" image under the Download column below. (You must have an unzipping program to extract this file, if you do not have a unzipping program you will need to download one from <http://www.winzip.com/prodpagewz.htm>)
2. Your browser may ask you if you want to open the application or save it to disk. Choose "Save it to Disk" then click on "OK" button to choose a directory on your hard drive. Please note this application is too large to fit on a 3.5" diskette. If you choose not to save it to your hard drive, you must have a Zip drive, CD-ROM Write-Once-Read-Many (WORM) recorder, or some other method for saving large files.
3. Wait while the Zip file downloads. The download time varies depending on your Internet connection, your PC's processing speed, and other factors. When the download is complete, access the Zip file through Windows Explorer or File Manager if your download screen closes and continue to step 5, if it does not close than continue to step 4.
4. After the download has completed, the download box will ask if you wish to OPEN, OPEN FOLDER, CLOSE. Choose "OPEN". A new box will appear.
5. Double click on "setup.exe" (a blue computer icon may be displayed.) Wait until the Setup Screen Welcome window displays.
6. Click NEXT after reviewing the text in the window. The setup window will display.

Typical - Installs all the files, including the database. This installation is used to install the software to a stand-alone PC, or to initially install the software to a network server. Most installations will be typical installations.

Workstation - Used to add the software to additional PCs that are connected to a network server, where all users share a database. This installation type does not load the database files to the PC; however, it does allow for sharing the database files that were installed to the network.

7. Click "Next" to install the application to the default destination folder.
8. Click "Next" to choose the default destination folder (recommended) or click Browse to select another destination folder. Then click "Next" to advance the setup program. The following message displays:
Please note the database destination folder for future WORKSTATION setups.
9. Click "OK" to access the Setup Complete window. Click "Finish" to complete setup.
